

A diagram illustrating the water cycle and runoff. At the top, a grey cloud is shown with black dots representing precipitation falling onto a green landscape. The landscape features a central depression and a stream on the right. Three vertical black lines are drawn across the scene. The text 'PRECIPITATIONS pluies ou neige' is centered above the precipitation. 'STOCKAGE DANS LES DEPRESSIONS' is placed above the central depression, with three arrows pointing down into it. 'SOL' is written on the left side of the landscape. 'RUISSELEMENT' is written diagonally across the lower part of the landscape, with a blue stream flowing to the right. The sky is light blue.
