

THE DIVIDED BALL AND PLANE METHOD

Measurements

These are measurements I have personally accepted as ideal. Realizing the "Standard" proportions were based on Latin types, I have worked these out as ideal American.

The Divided Ball and Plane Method has all these proportions worked out in the ball and plane itself and will automatically go into the head unless the ball or plane is changed. Unless the reader is seriously inclined to draw the head in realistic proportion, it is advised to forgo serious study of the measurements, depending merely upon the eye and the ball.
