

The Method serves as a check as well as for construction. If a girl head must be in drawing, to be beautiful or smart, the process in drawing literally means that features must be squared correctly on construction lines that are correct with cranium.

A METHOD OF CHECKING

The blue lines in the diagram above are our same construction lines. They may be done on tracing paper over any face. You can thus quickly find a feature that has been incorrectly placed. You can also "find" the ball and plane position in a photographic head this way. Whether you are building or tearing down, the method applies.
