

## CSS-animation in inner HTML in SVG format

← This is a normal  
svg path

This animation is conducted  
into `<html:div>` tags in `<html:html>` tags  
which I call "InnerHTML"  
So, you can't see it on Inkscape's UI.

```
<foreignObject
  id="foreignObject01"
  x="0"
  y="0"
  width="600"
  height="600">
  <html:html>
    <html:body>
      <html:div
        class="walkcycle" />
    </html:body>
  </html:html>
</foreignObject>
```

```
<style
  id="style6">
  .walkcycle {
    width: 300px;
    height: 345px;
    background: url (&quot;https://openclipart.org/download/223193/walkcycle-B.svg&quot;); no-repeat 0 0;
    -webkit-animation: play 3s steps(4) infinite;
    animation: play 3s steps(4) infinite;
  }

  @-webkit-keyframes play {
    0% {
      background-position: 0px 0;
    }
    100% {
      background-position: -1200px 0;
    }
  }

  @keyframes play {
    0% {
      background-position: 0px 0;
    }
    100% {
      background-position: -1200px 0;
    }
  }
</style>
```
