

# Raster image

built up from pixels  
laying in a square grid

any depicted object is made up  
by a subset of pixels, which have  
no more than a visual connection

clean appearance is limited  
to a certain size

# Vector image

objects are described by  
simple drawing elements,  
all of which can be edited

needs to be rendered  
for screens and printing

no size limit  
for rendering by the file format
