

Inkscape comes with a number of different predefined fill patterns. However, they are limited to black or white for colors. This tutorial will show how to change the color of the pattern.

1. Fill the shape/object of choice with the desired pattern with black for the color.
2. With the shape/object selected, select 'Replace color..' from the Extensions menu (Extensions > Color > Replace color)
3. The 'Replace color' box hex code should be 000000 (six zeros).
4. In the 'By color' box, use the hex code for the desired color change based on the chart below.
5. Click the [Apply] button. Then click the [Close] button after changes are applied.

Aqua	00FFFF	Navy	000080
Black	000000	Olive	808000
Blue	0000FF	Orange	FFA500
Brick	B22222	Purple	800080
Fuchsia	FF00FF	Red	FF0000
Gold	FFD700	Silver	C0C0C0
Gray	808080	Teal	008080
Green	008000	White	FFFFFF
Lime	00FF00	Yellow	FFFF00
Maroon	800000		

Note: "0" is the number, not the letter
