

Design the Next Rocket to Take Astronauts to the International Space Station!

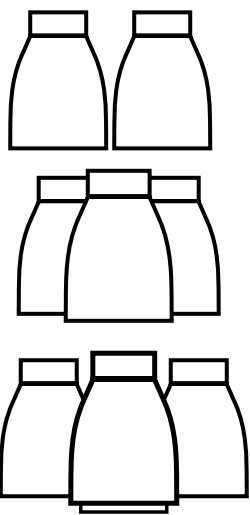

Mix and match the pieces below to design your rocket. Cut out your pieces and paste them together in the picture-box at the right, or simply draw them there. Then, when you've finished building it, name and color your design!

Rocket Engines

(How many of each type will you need?)

Liquid fuel

(Be sure to pick a wide rocket body to hold all the fuel you'll need!)

Solid fuel

(You can pick a narrow rocket body to hold the fuel if you want to!)

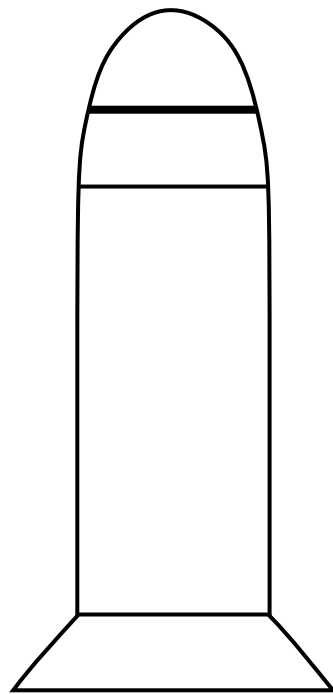

Crew Compartment

(This is where the astronauts sit!)

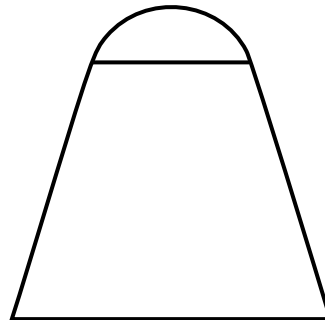

Flying Body

(You'll need wings and wheels!)

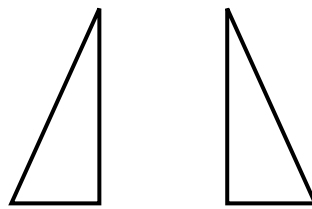

Capsule

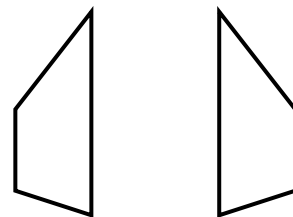

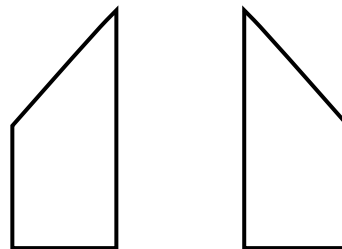

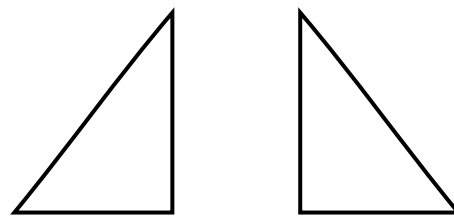

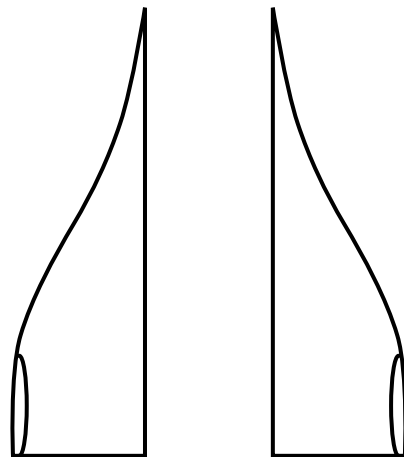

(You'll need parachutes!)

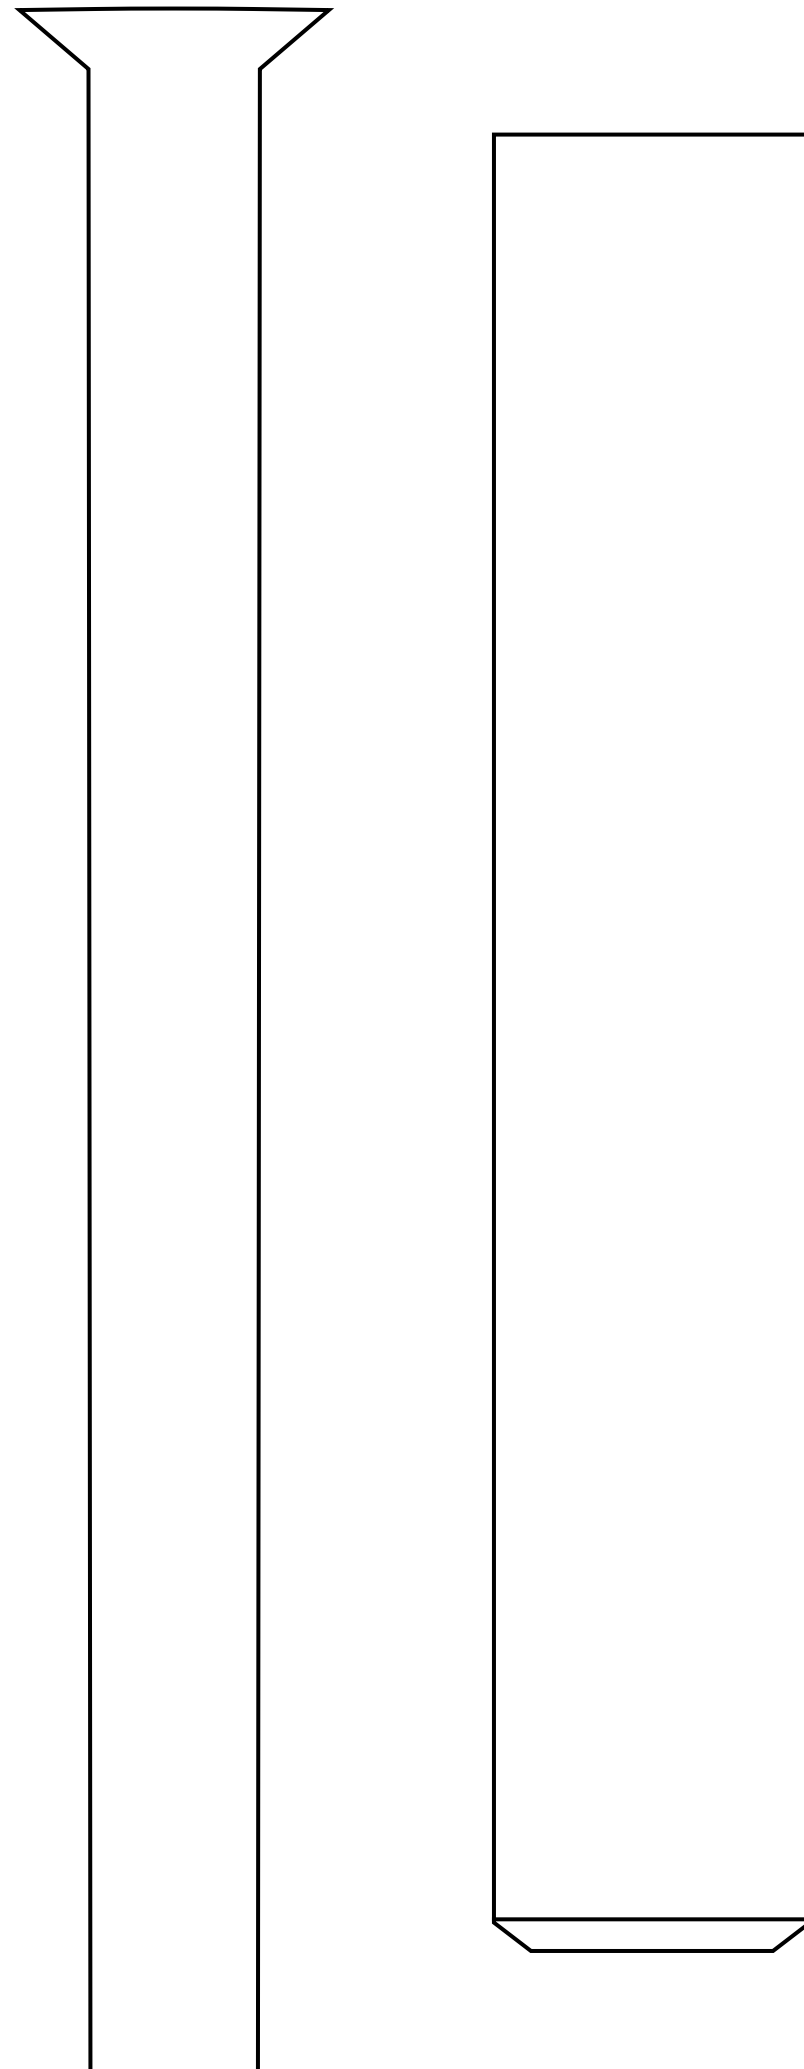

Fins

Wings

Rocket Body

Cargo Compartment

(This is where all the supplies go!)
